Summary Levels are geographic areas for which we provide data. They range from very large areas such as States, to much smaller areas such as Census Tract and Block. Summary Levels specify the hierarchical relationship of geographic areas, such as Tract within County within State or Block Group within Tract.

### Key Summary Levels

- 40 - State
- 50 - County
- 100 - Block
- 140 - Census Tract
- 150 - Block Group within Census Tract
