

# Regional plan update (RPU):

## why now?

### Respond to a changing region

10 years later, changing demographics, politics, market forces, and technologies are transforming our region

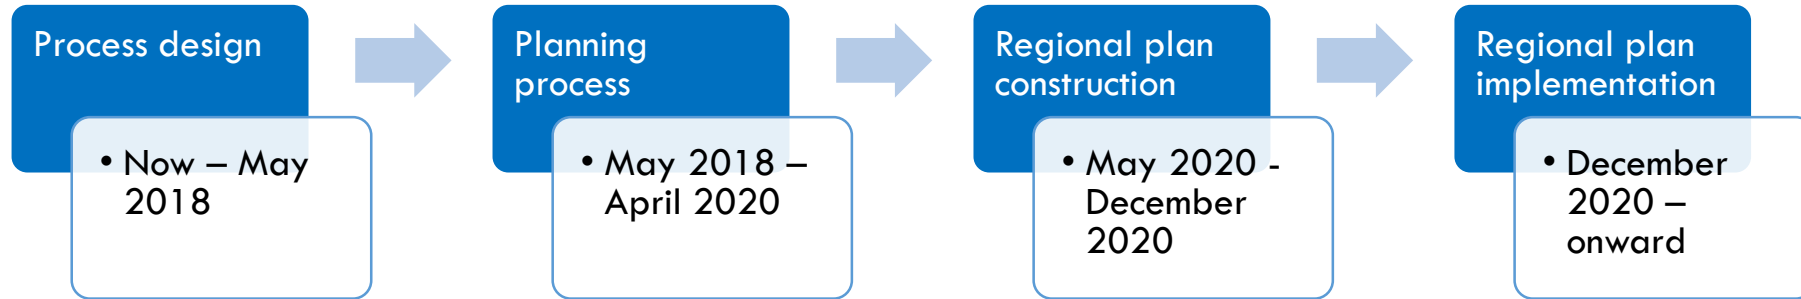

### Address critical challenges

Climate change adaptation, displacement, and racial equity were not a significant part of MetroFuture

### Agency innovation

MAPC's breadth of work and expertise has grown, allowing a more holistic approach to regional issues

### RPU process design goals

- ✓ Create an inclusive planning process that uplifts all voices in our communities
- ✓ Establish values and vision for the process design
- ✓ Produce a scope that outlines how the regional plan update will be undertaken
