

# DESIGNING COMPLETE STREETS

## STREET TREES

- Reduce energy use and heat island effects
- Reduce greenhouse gases and airborne particulates
- Reduce exposure to UV rays
- Increase residential property values

## STREET LIGHTS

- Facilitate safe movement of pedestrians, bicyclists, and motor vehicles
- Create an environment that feels safe and secure for pedestrians

## BIKE LANES

- Reduce injury and crash rates by 50%
- Promote increased cycling
- Reduce traffic congestion

## SIDEWALKS

- Reduce possibility of pedestrian accidents by half
- Streets with sidewalks on both sides have the fewest accidents
