What Can Greater Boston Do About Sea Level Rise?

Sea level rise in the wake of climate change will have a dire effect on parts of the Boston region. People and businesses will be displaced and municipal revenue will be threatened. Large parts of Boston and much of the coastline as we know it may be transformed.

There’s a lot we must do to prepare. Visit metrocommon.mapc.org to read the MetroCommon 2050 recommendations for making sure Metro Boston is prepared for – and resilient to – the impacts of climate change.

MetroCommon 2050 is the long-term land use and policy plan for making the Boston region more equitable and resilient.
What Can Greater Boston Do About Excessive Heat?

Climate change in Greater Boston will mean longer and more intense heat waves. This will be a health threat to the very young, the very old, to those who work outside, and to those with other health conditions. This could be especially hard on communities of color.

There’s a lot we must do to prepare. Visit metrocommon.mapc.org to read the MetroCommon 2050 recommendations for making sure Metro Boston is prepared for – and resilient to – the impacts of climate change.

MetroCommon 2050 is the long-term land use and policy plan for making the Boston region more equitable and resilient.
What Can Greater Boston Do About Inland Flooding?

Climate change means Greater Boston will face more frequent and intense storms. Inland flooding will affect our health, homes, transportation, economy, infrastructure, and more.

There’s a lot we must do to prepare. Visit metrocommon.mapc.org to read the MetroCommon 2050 recommendations for making sure Metro Boston is prepared for – and resilient to – the impacts of climate change.
