information:

Chelsea, Winthrop, and Revere Are Lowering Carbon Emissions and We Want to Hear From You!

We all use **energy** to heat and cool our homes, power our electronics, and drive our cars. Many of these energy sources use **fossil fuels**, which release **greenhouse gas emissions** like carbon dioxide (CO₂) into the air. This form of pollution impacts our communities and the globe- and leads to more **extreme heat days**, changes in **rainfall**, more **severe storms**, and **flooding**.

Creating a Zero Carbon Action Plan can help:

Save on energy costs and usage.

Improve the air we breathe by reducing dirty fossil fuels.

Make our communities safer and easier for walking and biking.

Reduce pollution in our waterways.

NSORS is a partnership established between the City of Chelsea, City of Revere, and the Town of Winthrop. The Office develops projects and programs to ensure these cities survive and thrive in a changing climate.
