

Electric School Buses: A Roadmap

Project Partners Communications Kit

Purpose: To provide project partners with resources to support their communications about the Electric School Bus Roadmap.

General Information:

- Link to the Roadmap Webpage
 - Full Link: <https://www.mapc.org/resource-library/electric-school-buses/>
 - Shortened Link: mapc.ma/elec-school-bus-roadmap
- Elevator Pitch and Newsletter Blurb
 - The [Electric School Bus Roadmap](#) is intended to be a guide for school districts and municipalities to start planning for an effective and efficient transition to electric school buses. It highlights the key steps that school districts should take and includes many additional links for decision-makers to learn more and connect to existing resources.

Sample Email Language:

Dear _____:

[Name of partner organization] is excited to share information about a new resource that we were excited to be a project partner on – the Electric School Bus Roadmap.

As you may already be aware, schools and school districts across the Commonwealth are making the transition to electric school buses and are doing so with the support from numerous technical assistance and funding programs. However, it can still be a somewhat challenging and at times confusing process.

That is where this Roadmap comes in. It is intended to be a guide for school districts and municipalities to start planning for an effective and efficient transition to electric school buses. It highlights the key steps that school districts should take and includes many additional links for decision-makers to learn more and connect to existing resources.

I hope as you access this Roadmap, you find it helpful to the work that you are doing to support school districts and municipalities in their transition to electric school buses.

Thank you,
