

MESM ACADEMY:

Mass Save Municipal Programs and Incentives

Monday, October 27
12 – 1pm

NOTIFICATION OF RECORDING

This meeting will be recorded. MAPC may choose to retain and distribute the video, still images, audio, and/or the chat transcript. By continuing with this virtual meeting, you are consenting to participate in a recorded event. The recordings and chat transcript will be considered a public record. If you do not feel comfortable being recorded, please turn off your camera and/or mute your microphone, or leave the meeting.

MESM ACADEMY:

Mass Save Municipal Programs and Incentives

Monday, October 27
12 – 1pm

Today's Lesson

Lesson Questions

- What is Mass Save and how can I participate in energy efficiency and decarbonization programs?

Learning Objectives

- Understand the Mass Save program and how it can help municipal reduce energy and fossil fuel use.
- Identify stepping-stones to building decarbonization and where to go to get assistance.

Introductory Poll

Rate your level of agreement with the following statements:

- I understand the Mass Save program and how it can help my municipality(ies) reduce energy and fossil fuel use.
 - I know the stepping-stones to building decarbonization and where to go to get assistance.
-

1 = Strongly Disagree
2 = Disagree
3 = Neutral
4 = Agree
5 = Strongly Agree

Intro to Mass Save Programs

Challenges in the Field

Utility Contracted Vendors

Project/Study Scenarios

Appendix: Offer Details

**Together, we make good
happen for Massachusetts.**

Your local electric and natural gas utilities and energy efficiency service provider are taking strides in energy efficiency: Berkshire Gas, Cape Light Compact, Eversource, Liberty, National Grid and Unitil.

As one, we form Mass Save[®], with the common goal of helping residents and businesses across Massachusetts save money and energy, leading our state to a clean and energy efficient future.

estimates

Implementation

INCENTIVE OFFER

Challenges from the Field

- Deferred maintenance
- Knowing what comes first, next, and what can wait
- Navigating gov't hurdles (municipal, state, and fed)
Ex. Procurement, City Council, Funding Cycles
- Finding a champion
- Knowledge to run the latest technology
- Finding money to make projects happen – this may be #1 for all of you

Utility Contracted Vendors

What are Utility Contracted Vendors?

- Vendors authorized by your utility to coordinate the implementation of energy saving and decarbonization projects.
 - National Grid Project Expediter (PEX)
 - Eversource Utility Contracted Vendor
 - Charging Station Installer (CSI)

Mass Law [Chapter 25A Section 14](#)

- Municipalities can contract with a Utility Contracted Vendor for projects under \$300k - per building, per year, per measure - 'directly and without further solicitation.'

What's the scenario?

You want to implement a \$50,000 lighting project and your procurement officer is saying the project needs to go out to bid.

PEX/Contracted Vendor

Chapter 25A Section 14

[General Laws](#) » [Part I](#) » [Title II](#) » [Chapter 25A](#) »

...costing one
...ty bills

...tal body or the judiciary may contract for energy
...less, directly and without further solicitation, with
...of such energy conservation projects authorized
...poses of this section, "energy conservation
...cluding, but not limited to: (i) energy conserving
...modification to windows and doors; (ii) caulking and weatherstripping; (iii) insulation; (iv) automatic energy control
...systems; (v) hot water systems; (vi) equipment required to operate variable steam, hydraulic and ventilating systems;
... (vii) plant and distribution system modifications; (viii) devices for modifying fuel openings; (ix) electrical or mechanical
...furnace ignition systems; (x) utility plant system conversions; (xi) replacement or modification of lighting fixtures; (xii)
...energy recovery systems; (xiii) on-site electrical generation equipment using new renewable energy generating
...sources as defined in section 11F; (xiv) decarbonization activities; and (xv) cogeneration systems.

(b) For purposes of this section, "total project cost" shall mean all construction costs of an energy conservation project, whether borne by the utility, agency, authority, body or the judiciary including, without limitation, the costs associated with equipment purchase and installation of such equipment. Ancillary services provided at no cost by

Share this with your community's procurement officer

What is the benefit of using a Utility Contracted Vendor?

- Procurement is painful!
- Utility Vendors know the process for getting utility incentives
- Vetted vendors are part of the MassSave ecosystem
- Allows the flexibility to build relationships with vendors

Decarbonizing Your Buildings

Do you need a study or is the building small enough to have vendor visits?

Scenario 1: Failing boiler at the Fire Station replaced with heat pumps

- PEX can give you a quote

Scenario 2: A large k-12 school HVAC system is expected to last 3 more years

- A study will give a full understanding of the building
- Not required if engineering design has already been planned (MSBA)

What's the scenario?

Your buildings HVAC system (RTUs, chillers, or boilers) are close to the end of life.

PEX/Contracted Vendor

CBA

Prioritizing and Building a Project Pipeline

How to leverage vendor visits, PPPs and CBAs to develop a project pipeline.

*Not every situation requires a study.
Consider what role your vendor partners, Owner Project Managers (OPMs), and design engineers play?

What's the scenario?

Your just getting started and you need to build a project pipeline.

Learning Check!

A Comprehensive Building Assessment (CBA) is required before starting any energy efficiency project.

Getting Electrification Ready

Weatherization

Ventilation

Controls

Hydronics

Variable
Frequency Drives

Transformers

Compressed Air

Lighting Controls

What's the scenario?

Your town wants to get off oil and fully electrify the old town hall. What's next?

Getting Electrification Ready

Scenario:

1950's Brick Town Hall

2 oil fired boilers, manual thermostats, no controls, no insulation in attic, high energy bills, "It's too hot upstairs, too cold downstairs"

Weatherization

- Minimize heat loss & gain
- Improves comfort

Building Management System (BMS)

- Controls efficiency & demand
- EBCx if existing BMS

CBA

BMS

Wx

Getting Electrification Ready

Building Management Systems (BMS)

- Incentives for first time BMS installation, replacement of existing BMS, and the addition or optimization of control sequences.
- Prescriptive incentives <300,000 sq ft
 - Based on # of sequences and sq ft
- Custom incentives >300,000 sq ft

Existing Building Commissioning (EBCx)

- Incentives for optimizing the performance of existing building systems

Weatherization

- Prescriptive rebate for buildings <20,000 sq ft
 - Based on R-value added per sq ft
- Custom incentive for buildings >20,000 sq ft
 - Requires a benefit cost analysis
 - Incentive based on energy savings

Help with Overcoming Challenges

- Incentive funding
- School's initiative
- Electrification engineers
- Project expeditors
 - Chapter 25a
- Mass Save incentives for training
 - Building Operator Certification (BOC)

Tips for Working with Mass Save Sponsors

- Know your energy efficiency representative
- Engage with us early
 - Plan for six months before the Green Communities application due date
 - Plan 2-3 years in advance of end of life for HVAC
 - Identify target buildings for Comprehensive Building Assessments
- Reach out with questions: If there's a building upgrade planned, chances are there's a potential incentive
 - ...and possibly an outside grant to match!

Learning Check!

At what point in your journey should you engage with your utility partner?

- A. As early as possible
 - B. After finding a project/vendor
 - C. Once the project is complete
-

Weatherization

WELCOME
WE ARE
OPEN
PLEASE COME IN

WE ARE MASS SAVE®:

Three Distinct Pathways for Weatherization

Improving performance of the building shell:

- Stand-alone energy efficiency investment, regardless of fuel type
- Enabling investment in conjunction with electrification
- Measures typically consists of: Air Sealing, Insulation, and Weatherstripping

Three-tier pathway for commercial projects

- “Prescriptive” for small commercial buildings (< 20k sq ft) increased from 8k
- “Custom-express” approach for medium-to-large buildings (up to 100k sq ft)
- “Custom” approach for large/complicated projects (> 100k sq ft or unique building characteristics)

Weatherization Incentive Details

Custom Express Weatherization Tool for Project Expeditors and other installation vendors

- Results have been more consistent savings estimates from all vendors and faster utility reviews
- Latest Wx tool updated in March 2025
- Wx tool used for both Prescriptive/Custom Express

Weatherization incentives for Prescriptive pathway (< 20,000 sq ft)

- Weatherstripping incentives = \$10 per linear ft
- Air Sealing incentives = \$103 per hour of work
- Insulation incentives = net R value* SF
- All incentives paid by Gas PA (or Electric PA if heated by oil, propane, or electric heat)
- No pre inspection or pre-approval required – can be submitted as a rebate
 - Pre-existing photos are required

Weatherization Incentive Details Continued...

Weatherization incentives available for projects saving oil/propane as well as gas and electric

- Threshold was reduced to 0.5 allowing more projects to screen and qualify for incentives
- All projects over 20,000 sq ft must pass the Benefit Cost Ratio (BCR)

Heat Pumps

Prescriptive Electrification Incentive Highlights

© 2025 Commonwealth of Massachusetts

Equipment Type	Current Rebate Amount	Rebate Amount as of 1/1/2026	Efficiency Requirement
Air Source Heat Pumps (ASHPs)	\$2,500 per ton	\$2,000 per ton	Refer to MassSave.com/HPQPL
Air Source Variable Refrigerant Flow (VRF)	\$3,500 per ton	\$2,800 per ton	
Ground Source Heat Pumps (GSHPs)	\$4,500 per ton	\$3,600 per ton	

- Current rebate available for projects installed and paid by 12/31/25. Requires existing commitment letter.
- Incentive calculated by the AHRI rating of the outdoor unit's cooling capacity
- Incentive is the same for displacing oil, propane, natural gas, or electric resistance heat
- Partial displacement must include integrated controls or utilize the existing management system
- New construction projects not eligible for these incentives

Prescriptive Rebates

Eligible equipment (**must be on QPL**)

- **Air source (air-to-air) heat pumps**
- **Variable refrigerant flow air source heat pumps**
- **Ground source heat pumps (geothermal)**

Eligible projects

- **< 150 tons, partial or full displacement**
- **Used for space heating and cooling**

Rebate amount

- **Rebates are based on tonnage**

Custom Path

Use custom for...

- **Projects >150 tons**
- **Equipment not covered by prescriptive offer**
- **Process heating**

Eligibility criteria

- **Must produce net MMBTU reduction**
- **Must NOT increase GHG emissions**
- **Must meet cost-effectiveness criteria**

Incentive amount

- **Incentives vary based on scope and cost**

Lighting

Lighting Downstream Program

- LED fixture incentive deadline extended to 10/31/26 (projects must installed and paid)
- Presently, other C&I customers only receiving lighting controls incentives
- \$90 for smart controls

Product Code	Product Description	Per-Lamp Incentive			
Indoor Luminaires & Indoor Retrofit Kits					
88A	LED Indoor Retrofit Kits: 1x4, 2x2, and 2x4 Troffers	\$50	LED Indoor Retrofit Kits for 1x4, 2x2, and 2x4 Troffers. Eligible kits are required to be listed by the DLC and must meet DLC technical requirements for indoor retrofit troffer kits.	23	
88B	LED Indoor Troffers: 1x4, 2x2, and 2x4	\$70	LED Indoor 1x4, 2x2, and 2x4 Troffer Fixtures. Eligible fixtures are required to be listed by the DLC and must meet DLC technical requirements for indoor troffer luminaires.	23	
89	LED Linear Ambient	\$70	LED Linear Ambient: Direct or with Indirect Component. Eligible luminaires or kits are required to be listed by the DLC and must meet DLC technical requirements for indoor luminaires or indoor retrofit kits—linear ambient with greater than 375 lumens per foot.	23	
63	Interior Integral Fixture Mounted Dual Sensors	\$45 (per fixture)	Integral fixture mounted dual sensors with motion and photocell/ambient light sensors. System to control motion response and illumination levels. Only one incentive per fixture.	20 (per fixture)	
63A	Integral Fixture Mounted Dual Sensors and Network-Capable Controls	\$90 (per fixture)	Integral, fixture-mounted, addressable sensors with motion and photocell/ambient light-sensing capabilities along with embedded programming that can be configured and networked. System to control motion response, illumination levels, and scheduling. Please see additional requirements for networked lighting control systems below. Only one incentive per fixture. See the specification and QPL for specific requirements: https://www.designlights.org/lighting-controls/	50 (total wattage of networked group)	

Building Management Systems

Building Management System (BMS)

Sequence Eligibility by Major Equipment

- All fuel types eligible
- Eligible solutions:
 - First time installs
 - Replacements of >15 yr old systems
 - Add-on's
 - Optimization
 - Subscription based controls
- New equipment eligible in 2025 – not new buildings
- Incentives:
 - Incentives are either \$0.05 or \$0.10 x SF x number of sequences
 - Up to 13 sequences are eligible

	Primary or Secondary HVAC Equipment	System Schedule and Unoccupied Setbacks ^[1]	Optimal Start/Stop ^[1]	Reset Chilled Water Temperature	Reset Static Pressure	Reset Boiler Water Temperature	Demand Control Ventilation	Economizer Control - Dry Bulb or Dual Enthalpy	Reset Supply Air Discharge Temperature	Reset Condenser Water Temperature

Variable Frequency Drives

WE ARE MASS SAVE®:

EVERSOURCE

nationalgrid

Variable Frequency Drives

Variable Frequency Drives (VFD) & VFD Motor Combo Incentives

- Pre-Inspection required
- Replacement of failed/bypassed/end of life VFDs may now be eligible
- Run as custom
- Water/Wastewater VFD's excluded from prescriptive offering (may be eligible for custom incentives)

Table 1: Select VSD Installation Type

BDF	Boiler Draft Fan	FWP	Boiler Feed Water Pump	PE	Process Exhaust and Make-Up Fan
BEF	Building Exhaust Fan	HWP	Heating Hot Water Circ. Pump	RFA	HVAC Return Air Fan
CTF	Cooling Tower Fan (Single-Speed Only)	MAF	Make-Up Air Fan	SFA	HVAC Supply Air Fan
CWP	Chilled/Condenser Water Distrib. Pump	PCP	Process Cooling Pump	WHP	Water Source Heat Pump Circ. Pump

For the VSD types in (boldface/highlighted) above, page 6 of this application must be completed.

Variable speed drives for any application beyond those shown in the table above must pursue a Mass Save [Custom Project Application](#).

Table 2: Select VSD Size

Horsepower	VSD Incentive	Horsepower	VSD Incentive	Horsepower	VSD Incentive	Horsepower	VSD Incentive

Transformers and other Electric Programs

Transformers/Refrigeration Projects

- Custom approach
- Must pass BCR
- Incentive based on kWh savings

Chillers (cooling only)

- Prescriptive incentives for both air-cooled & water-cooled systems
- Range from \$20 to \$32/ton
- Extra incentive for exceeding the minimum efficiency requirements

Midstream (point of sale discount)

- For A/C only systems

Eligible Equipment			Proposed Equipment		Incentives		
Type (*)	Unit Size-AHRI Net Tons	Threshold Efficiency: FL or IPLV	AHRI ratings		Base Unit Incentive (per ton)	Base Total	Performance Incentive For each 0.1 EER point above or for each 0.01 kW/ton point below minimum criteria relative to IPLV
			Net Tons	Unit Efficiency (**)			
Water Chillers @ AHRI 550/590							
(A) Air Cooled w/Condenser, Electrically Operated/Remote Condenser (split system). Must be equipped with matching condensers.	< 150 Tons	FL: 10.61 EER IPLV: 16.59 EER	NT(A): _____	FL: _____ EER IPLV: _____ EER	\$30	BT(A): _____	\$2.20
	>= 150 Tons	FL: 10.61 EER IPLV: 16.91 EER			\$32		\$4.00
(B) Water Cooled, Electrically Operated, Positive Displacement.	>= 75 and < 150 Tons	FL: 0.684 kW/Ton IPLV: 0.466 kW/Ton	NT(B): _____	FL: _____ kW/Ton IPLV: _____ kW/Ton	\$25	BT(B): _____	\$5.00
	>= 150 and < 300 Tons	FL: 0.627 kW/Ton IPLV: 0.418 kW/Ton			\$22		\$4.50
	>= 300 and < 600 Tons	FL: 0.580 kW/Ton IPLV: 0.390 kW/Ton			\$22		\$4.50

Equipment Type	Incentive Amount
Air Source Air Conditioner	Up to \$150/ton
Water-/Evaporatively Cooled Air Conditioner	Up to \$200/ton
Dual Enthalpy Economizer Controls (when installed with new qualifying equipment)	\$250/unit

Electric Lawn Equipment

- Rebate – submit after purchase
- Limit of 10 pieces of equipment per year, per account number

Retail-Grade Battery-Powered Lawn Equipment

Lawnmower*	\$75
Leafblower	\$30
String Trimmer	\$30
Chainsaw	\$30

**Must be <500 watt-hour battery capacity*

Professional-Grade Battery-Powered Lawn Equipment

Lawnmower**	\$3,500
Leafblower***	\$100
String Trimmer***	\$100
Chainsaw***	\$100

***Must be >7,000 watt-hour battery capacity*

****Must be >500 watt-hour battery capacity*

Steam Traps, Boiler Controls, and other Gas Measures

WE ARE MASS SAVE®:

Prescriptive Gas Measures

All rebates/incentives for new gas fired equipment ended 12/31/24

- Boiler Controls and Steam Traps
- Thermostats
- Faucet Aerators & Shower Heads

Measure Information							
Type of Equipment	Date Installed	Manufacturer	Model Number	Size of Unit Controlled (BTU)	Installed Cost	Qty Installed¹	Rebate Amount¹
After-Market Boiler Reset Controls \$225							
Steam Traps \$50							
Showerheads up to \$20							
Faucet Aerators up to \$8							

Measure Information—Thermostat Rebates							
Type of Equipment	Date Installed	Manufacturer	Model Number	Does the Thermostat Control Air Conditioning?	Installed Cost	Qty Installed¹	Rebate Amount¹
Programmable Thermostat up to \$25				<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No			
Wireless-Enabled Thermostat up to \$100				<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No			

Steam Traps, Water Heating, Pipe Insulation

Custom Steam Traps

- See your gas energy efficiency representative to learn details
- Customers can now participate every year

Water Heating

- Instant rebates from distributor (Midstream Program)

Heat Pump Water Heaters						
Equipment	Sector	Existing Water Heating Fuel Type	Size	Required Efficiency	Customer Incentive (\$/Unit)	
Electric Heat Pump Water Heater (HPWH)	Commercial	Electric, Propane, Oil, or Natural Gas	<= 85 Gallon	UEF >= 3.3	\$1,000	
			> 85 and <= 120 Gallon	COP >= 3.6	\$2,200	

Pipe Insulation

- Pipes, Tanks, & Valves eligible
- Custom Express tool
- Incentive based on savings

Additional Offers

Additional Mass Save Programs:

- New Construction & Major Renovations
- Building Operator Certification (BOC) Training
- NEED Teacher Training
- Demand Response

Utility Programs:

- EV Charger Programs

Next Steps

- Please take 3-5 mins to please complete the anonymous evaluation form (link in chat)

Upcoming Events:

- **November 3:** Training on Grant Writing & Creating Project Pipeline
- **November 19:** PLN Session
- **November TBD:** Working in a Muni Gov 101

Thank you!
