MOBILISIGHTS: DRIVING PROGRESS THROUGH DATA

Serving as the exclusive source of embedded telematic data from the Stellantis automotive brands and millions of connected cars, Mobilisights, the Stellantis Data Business Unit, works with partners to transform the way fleets operate.

By partnering with Mobilisights, Stellantis Fleet is able to deliver comprehensive data to help maximize the way you manage your fleet. We help manage six brands, over 35 models, over 100 data signals and real-time data. Mobilisights fleet management data packs can enable a multitude of use cases:

Fleet Optimization: Track vehicle location and fuel usage to create efficiencies and better manage fleet activity.

Safety of Your Drivers and Fleet: Get a clear picture of driver behavior and habits, as well as monitor the health of your vehicles.

Electric Vehicle (EV) Transition: Discover potential efficiencies related to EV charging management.

Productivity: Data can provide progress reports for your business.

BENEFITS OF NATIVELY EMBEDDED TELEMATIC DATA INCLUDE:

- Cost Savings: Avoid hardware and installation costs
- Ease of Operation: No downtime, immediate and zero-touch activation
- High-Quality Data: Accurate, granular and reliable data that is validated end to end from vehicle to cloud and curated for processing
- Data Protection: A secure end-to-end data stream protecting vehicle owner's privacy and data integrity
- Flexible Integration: Ready to seamlessly integrate with third-party Fleet Management platforms

THE FUTURE OF STELLANTIS FLEET

STELLANTIS TECHNOLOGY

Stellantis is working to reimagine mobility as we know it today and set new benchmarks in our fast-evolving industry.

Shaping the future of mobility means offering innovative and sustainable products and solutions that meet the evolving needs of both customers and the planet.

Through a host of integrated technologies, we are working to satisfy all types of transportation requirements with vehicles that are both attractive and affordable to customers around the world while, at the same time, helping to reduce CO2 emissions.

ELECTRIFICATION

We are in full execution mode on our electrification journey, actively changing how the world moves.

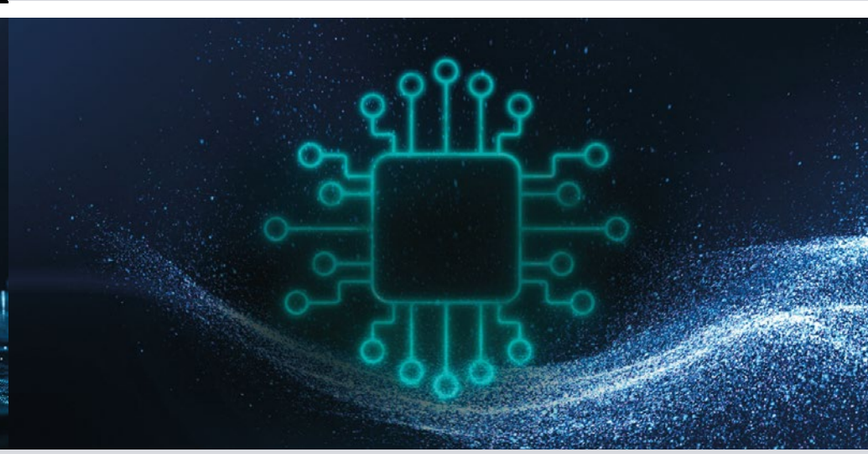

Our course is set. By the end of the decade, we're aiming for 100 percent of sales in Europe and 50 percent of sales in the United States to be Battery Electric Vehicles (BEV). Plus, we plan to offer more than 75 BEV models and reach global annual BEV sales of 5 million units by 2030.

INTELLIGENT VEHICLES

Software is driving an unprecedented transformation in the automotive industry, one that will progressively integrate flexible and customized mobility into our daily lives.

Stellantis has a comprehensive software strategy through which we are reinventing how vehicles are designed, engineered and operated. This enables us to transform the mobility solutions we offer, making them even more customer-centric and connected.

AUTONOMOUS DRIVING

Stellantis is developing Level 2 autonomous driving solutions for the road, and many of our vehicles are already equipped with innovative Advanced Driver Assistance Systems (ADAS).

Building on this, we are working with leading technology partners on further advances in automation to help bring safer and more sustainable mobility to our customers.

NAUTO: SAFER FLEETS AND ROADS WITH PROTECTED PRIVACY

Preproduction model shown. Actual production model may vary.

nauto

Nauto is an in-vehicle safety system that uses predictive AI to reduce collisions and coach drivers in real time.

Nauto is a leader in Artificial Intelligence (AI)-powered safety and operations excellence for commercial fleets. Nauto simplifies day-to-day operations by consolidating driver and fleet safety, risk and core telematics in a driver-friendly platform. Nauto is trusted by over 1,000 fleets worldwide across multiple industries with customers seeing up to an 80% reduction in collisions.

Why do fleets need to address distracted driving?

- 3,000 fatalities each year are estimated to be caused by distracted driving
- 70% of collision-related losses stem from inattention, not the external risks and aggressive driving that Advanced Driver Assistance Systems and telematics systems address
- 80% of collisions involve some form of driver distraction, typically occurring within three seconds before the crash

How do customers benefit from using Nauto?

- Up to an 80% reduction in collisions
- Up to 80% of drivers self-improve without the need for coaching
- Rapid Return on Investment in as little as 4.5 months for self-insured fleets

Works where your drivers do

Nauto detects risks and distracted driving while at night, in the rain and snow, and even when your drivers are wearing sunglasses.

Empowers drivers to self-coach

Nauto's extraordinarily accurate in-vehicle alerts help drivers self-correct in the moment. Personalized safety scores and even videos enable self-coaching and reduce the need for manager-led coaching. Over 80% of drivers self-improve their driving behaviors without any additional coaching.

Respect driver policy

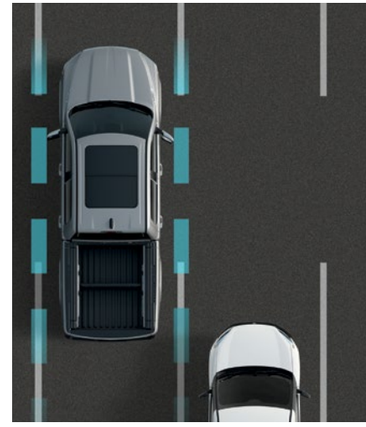

The Nauto system uploads video following high-risk events and collisions, maintaining driver privacy and trust. With Nauto, there's no need to record everything, live stream nor drop in unannounced.
